

DIVIDENDS

BIG DIVIDEND PAYMENTS DUE

Nearly \$300,000 Will be Disbursed Tomorrow.

CONTINENTAL COPPER ORES

MINING CONGRESS CAN HAVE ASSEMBLY HALL.

Dividends aggregating \$290,000 will be checked out by Utah mining companies tomorrow. The United States company contributes \$200,000, or 40c a share; the Daly-West company pays \$72,000, or 40c a share, and the Mammoth company adds \$20,000, or 5c a share. On Wednesday last the shareholders of the Silver King company took down \$100,000, or 25c per share, so the first half of the month makes a pretty fair showing as regards payments made.

The United States company's dividend is the first declared, but there is no question in the world but what another and possibly two more will be paid between now and the middle of January.

There is considerable speculation as to what the Daly-West directors will do next month. That the usual dividend can be paid if the management so wills, there is no question, but whether it will do so or not is another question. It is understood that the United States and Daly companies will insist upon receiving \$300,000 before permitting the extension of the long drain tunnel in the mines of the Daly-West and Daly-Judge companies. If an agreement should be reached to have that work done, even though the cost was increased by the companies that the extension would benefit, there is little doubt that the dividends of the Daly-West would be reduced.

In addition to the payments mentioned, the Tetro directors have provided for the payment of another \$5,000 dividend this month, the declaration having been made yesterday afternoon. With this distribution the company will have paid its shareholders \$9,000. The treasury is said to contain in excess of \$20,000 and the mine is opening up better and better all the time.

COPPER ORES IN CONTINENTAL.

Alta Property is Responding Well to Development.

Development at the mines of the Continental company at Alta is of such a nature that Manager Henry M. Crowther is wearing a broad smile these days. A consignment of ore which came from the junction of the Grizzly and Laveria veins was marketed yesterday. Assays on the controls showed that the ore carried 19.2 per cent copper, 3.2 per cent lead, 13.5 ounces silver and 80c in gold. Analysis showed that the ore contained 13.5 per cent and the silica 17.1, while, remarkable as it may seem, there was only 1 per cent of sulphur in the ore. This ore is coming from new workings and Manager Crowther is counting upon its development into something very much out of the ordinary.

Another pleasing feature in the operation of the property, Mr. Crowther reports, is the fact that the amount of copper in the second-grade ores of the mine has doubled, again, in the past few weeks. Until very recently the ore shipped to the smelter has been showing an average of only a little better than 3 per cent, while now 4 per cent and better is the rule. This grade of ore also carries fifteen ounces silver, 15 per cent lead and about \$1 in gold per ton. Manager Crowther does not attribute the rise in copper contents of this grade of ore so much to physical changes in the mine as to the improved methods employed in its extraction. He is very much pleased with conditions at the mine, and is patiently awaiting the day when it will be possible to connect the camp by rail and move the ores at a much less cost per ton.

MINING CONGRESS MATTERS.

Committee Promised Use of Assembly Hall.

John Derr, James Chipman and J. E. Jennings, the special committee of mining congress delegates commissioned to interview Mormon church officials with a view to securing the use of Assembly hall as temporary home and headquarters for the institution pending the election of a permanent building in case the approaching session voted to make this city the permanent home, reported yesterday.

The committee was treated with the greatest consideration by President Joseph P. Smith and other officials, who expressed themselves as being in hearty accord with the efforts being made to hand the prize. Assurance was given that the building would be placed at the disposal of the congress, and that every effort would be made to see that the headquarters were made comfortable pending the removal of the officials to permanent quarters.

Professor W. H. Tibbals, chairman of the Commercial club's committee on mines and mining, who is also a delegate to the congress, is sending out to prominent mining and business men interested in the growth and welfare of the mining industry of Utah, 500 blank applications for membership in the congress, together with a letter urging them to send in their applications together with checks for \$7 each, which covers the cost of membership and pays one year's dues of \$2.

"While we shall not likely be able to go to Portland accompanied by a brass band, as will the delegation from Texas," said the professor, "we hope to be able to leave here Saturday next with a list of applications for membership, with accompanying fees, that will prove a stronger argument than would the same amount of money expended for a brass band. It is possible for the people of Salt Lake and Utah to help wonderfully in advertising this state in the manner explained, and I feel that the response to the letters and applications I am sending out will be great. Many strong workers will be in the delegation from here and, with Judge Powers to make the argument, backed with substantial evidence that we are in earnest in the desire to have the congress establish itself here, I believe we can prevail on Texas to vote with us."

COPPER SULPHIDE ORES.

Ohio Company Opening Rich Body on Mine's Lower Levels.

At the Ohio Copper company's property at Bingham an immense body of high-grade copper sulphide ore, ore carrying 30 to 40 per cent of the red metal is now being opened on the lower levels, and the management is sanguine that the next month or two is going to see change conditions in the property that healthy shipments of this ore will be the regular order.

It is estimated that there is now exposed in the mine 1,000,000 tons of mill-

ing rock through which is interspersed occasional ribs of high-grade. To mine these different grades separately is not at all to the liking of the management, owing to the expense. On that account there is every likelihood that next year if milling is not abandoned entirely and the entire product broken and shipped to the smelters just as it comes, that the milling plant will be materially enlarged.

At any rate, the mine is growing bigger all the time and the day is coming when mining has got to be done on a much more extensive scale and the cost of production correspondingly trimmed down. These are matters that are now receiving serious attention and, with the advent of another season, plans will have been matured for affecting the necessary changes in the plan of campaign.

Just now the company is employing about sixty men in the mine and something like twenty in the mill, where an average of about 125 tons of ore per day is being treated.

MINING AROUND MILFORD.

Majestic Affairs—Estelle's New Mill—Waiting For A. B. Lewis.

Milford, Aug. 12.—Milford is beginning to take on something of its old time appearance again. The Majestic company, under the management of Mr. E. P. French, is working thirty-five men distributed amongst the three principal properties, the O. K., the Old Hickory and Harrington-Hickory, and prosecuting some lease work on the Vicksburg, thus covering all of their properties in a mild campaign of development. Mr. W. H. Alexander was down Wednesday and Thursday, accompanied by E. P. French, presumably for the purpose of fortifying himself with a few facts for an annual stockholders' meeting, which will be held in Denver on the 22nd of this month. It is understood here by those in touch with the administration that a large force will be put on at the Majestic mines immediately after the Denver meeting.

Under the careful and intelligent management of Sam Tarbet, the Estella is being run out into a property of unquestionable merit. Large quantities of ore are being blocked out for delivery at their mill as soon as it can be built. The stone foundations for the mill were completed last Tuesday and the machinery for the superstructure is expected to arrive this week, when construction will be pushed with great speed.

The Brown-Harrison, one of the few properties to continue on in their campaign of development during the period of depression, is working a large force at the Brown Con. property and meeting with very encouraging results. The property is being operated, is certainly deserving of credit and success for the manner in which he has held to his convictions and stuck to his post. You may put the Beaver-Harrison down in your list of mines, the career of which it is worth while to watch.

A gentleman whose coming is reported for the immediate future and whose arrival will be hailed with acclamations by a large per cent of the Beaver county population is State Senator A. B. Lewis, organizer of the Monarch company. It is reported here that Mr. Lewis has succeeded in financing the Monarch to an extent that will enable him to discharge the indebtedness of the company here, take up the mining options which he holds, and inaugurate a systematic and intensive course of development. Of course this is all conjectural, pending Mr. Lewis' arrival, but hope, kindled by the trust which the people of this section repose in Mr. Lewis, is occasioning more or less speculation as to how things will turn out when the senator starts in again.

Mr. Lewis has some excellent properties under bond here and in Frisco, and he means to push things in his way, you may expect a report very shortly that there is "something doing."

OLD PRODUCER REVIVED.

St. George Men Are Bringing the Hope Mine to the Front.

Modena, Aug. 12.—Dr. J. A. Affleck of St. George left here yesterday for Salt Lake City with a lot of samples of ore, showing well in silver, copper and gold, from the Hope mine, owned and operated by C. W. Johnson. Several years ago was in charge of operations at the Hope mine. The property is twenty-five miles southeast of Acoma, Nev., in the Pennsylvania mining district, and seven miles from the Colorado border.

The Hope was opened eighteen years ago and gives every promise of becoming a very rich mine. The ore is of the silver and copper ore and was shipped from a stop at the 100 foot level of the mine and that netted \$20,000 but as silver was the predominant metal and the market weak, and owing to the remoteness of the mine from the railroad, it was permitted to remain idle, and only worked at intervals.

During the past eighteen months the inclined shaft has been pounded down to a depth of 250 feet, showing a quantity of ore that is said to be equal to any that was ever mined in the Hope, and possibly better, which the prospecting has determined by assay of the samples he has with him. The ore of known value runs from 25 per cent copper and \$2 to \$3 in gold per ton. A carload of ore was shipped to the smelter and the ore was shipped to the smelter and the ore was shipped to the smelter.

BACK FROM BEAVER COUNTY.

Salt Laker Inspect Properties That Are Soon to be Heard From.

After having inspected several propositions in which they are individually interested and concerning which news will come later, and after having seen the Horn Silver and the other properties of the Majestic company, W. H. Alexander and D. P. Rohlfing, the mining engineer, returned to the city yesterday morning.

Mr. Alexander said they did not find time to inspect either the Old Hickory or the O. K., though from Superintendent French it was learned that the latter, originally planned as being carried out. A winze was being sunk from the 400-foot level in the O. K., and although the work was exposed in it, water was making faster than it could be conveniently handled without a pump. It was thought that it would not have to be abandoned for the time being, or until after the approaching meeting of the company at Denver, when it was presumed arrangements for a settled campaign would be arranged.

Directly following the organization of the company on the 22nd, it is expected that W. B. Alexander and other officials interested in the welfare of the company's enterprise will come on from Denver and decide in a general way what shall be done.

COPPER BULLION OUTPUT.

Independent Smelters Ship Over \$64,000 Pounds During Week.

While the amount of copper bullion forwarded to the eastern refineries by the independent plants during the week was slightly less than during the same previous seven days, it was still very good. The Bingham Consolidated sent 34,500 pounds, the Utah Copper 32,750 pounds, and the Utah & Eastern, 6,000 pounds, a total of 84,250 pounds, including the usual production of the American company.

The Yampa smelter at Bingham is running very smoothly these days and several carloads of copper matte are being sent to the big valley plant weekly. The Utah Copper company's big milling plant is turning out a fine tonnage of concentrates that carries more copper, silver and gold than is usually produced in milling furnaces, and the time is not far off when its output will be several times what it is today.

FROM CARIBOU DISTRICT.

Western Ex. Company's Representative Inspected Gold Mines.

Sam M. Levy, of the Western Exploration company, who is on a tour of inspection, returned from a week's trip into the Caribou district, Idaho, forty miles north of Soda Springs. What he went to see or what was the result of his investigations he declined to discuss yesterday.

though he did admit that the proposition taking him was a good one. His attention being called to the fact that several Salt Laker had been into that country during the past few weeks, and that it was rumored that H. S. Jones had been there, Mr. Levy said he had run across some of the same people during his trip, much as he would have liked to run for companionship's sake, or the section in general he speaks very well, but his own business was of such character that he was not at liberty to discuss it.

Mr. Levy was accompanied as far as the Caribou district by his sister, who is still enjoying an outing at that place.

MINING STOCK EXCHANGE.

Week Closes With the Market Generally Strong.

The week on the mining exchange closed with sales of stock aggregating \$9,500,000, the selling value of which was \$3,575,850. During yesterday's single regular and open board calls 7,000 shares, worth \$800, changed hands. Excepting the weakness displayed by Daly West and Century the market has ruled strong and more interest has been manifested than for some months past.

Daly has been quite active at prices ranging from \$2.40 to \$2.50. Buying orders are still in evidence, though reports from the market indicate that much higher prices must soon prevail, notwithstanding the apparent effort to keep it down.

Daly-Judge is up, sales being made at \$2.40 at the close. Daly West opened a free offering at \$12.50, but from that figure it moved to \$12.50 at the close of the open board call.

Butler-Liberal, Carls, Star Consolidated, Uncle Sam, Tetro and Yampa have all behaved well, sellers having had the whip hand all through the week.

The passing of its August dividend, with a prospect that several months may elapse before another distribution is made, has caused Grand Central to weaken, though holders still refuse to part with it for less than \$3.50.

Mammoth, which more than earned its \$30,000 dividend during the first ten days of the month, is strong at \$150 bid, and the talent is coming upon its advancing to \$2.00 in the near future.

The King closed down to \$45 while the best offer was \$40 yesterday. This is from \$18 to \$18 a share less than it commanded early in the year, and little more than half what it was going at three years ago. For all that it continues to pay \$100,000 a month in dividends.

Following is the list of final quotations and record of sales made:

Bingham Mining Notes.

(Bingham Bulletin.) Favorable changes are taking place in the lower tunnel of the John S. Brown work was resumed a few days ago. The ground is softer, with time coming in.

The Copper company's ore is now in about 60 feet on their tunnel. A building for a motor, compressor and other machinery is in progress.

Joseph Leyson has finished the 100-foot tunnel of the Silver Cord claim of the Pine Tree Mining company's property. This group consists of four locations, including the Copper company's property, the Wyoming cutlumber, and the principal owner.

Manager McCarrick started work a few days ago on the Freeda and Papea claims, property of the Little Eddy Gold and Copper company. The company's ore is high as 30 per cent copper are encountered and the workings have never made such showing as at present.

Major C. E. Mitchever of Cleveland, Ohio, formerly of Stockton, was in camp last Friday and Saturday inspecting several prospects and mines. It had been five years since he was in Bingham and the changed conditions gave him quite a surprise. The major is the original organizer of the Honeine company at Stockton.

In acquiring the Alamo group of claims the lower tunnel of the John S. Brown work was resumed a few days ago. The ground is softer, with time coming in.

The Copper Belt road will in a rather more than average day last Monday when it brought down 30 cars (150 tons) of ore, as follows: From the Utah Copper, 2; from the Yampa, 1; from the Tetro, 1; from the Yampa, 1; from the Tetro, 1.

off for the Bingham Con. no shipment having been made from the Commercial mine. The total downhaul of the busy little road during July was within a fraction of 20,000 tons.

Utah Stocks in Boston.

(Special to The Herald.) Boston, Mass., Aug. 12.—Coppers closed strong for the week, though trading was light.

	Sales	High	Low	Bid	Ask.

Ore and Bullion.

Ore and bullion settlements in the local open market during the past week reached \$482,500, or \$27,300 more than during the week previous. Yesterday's settlements were made by the Yampa & Eastern, amounted to \$1,000, as follows: Silver, lead, gold and copper ores, \$47,000; base bullion, \$2,500.

Metal Market.

Silver, 88c per ounce. Copper (cast), 17c per pound. Lead in ore, \$1.50; New York, \$1.10 per 100 pounds.

Mining Notes.

A carload of carbonate ore from the Deems company's Bingham property is at the sampler, taken at the Yampa & Eastern.

General Manager Duncan MacVie of the Bingham Consolidated was at the Eagle & Blue Bell property yesterday.

There was released from the Yampa & Eastern sampler yesterday one car of ore from Tintic and one from Tonopah.

In addition a carload of matte and a carload of copper bullion was sampled for the Yampa & Eastern & Eastern respectively.

Ed H. Meade went out to Tintic last evening to size up conditions at the Carls.

L. H. Beason, mining editor of the Deceit News, accompanied by Mrs. Beason, left yesterday afternoon for a two or three weeks' trip to the big show at St. Louis. During Mr. Beason's absence Gordon Higgins will do the mining stunt on the paper.

J. M. Burnell, a mining operator of Denver, passed through the city yesterday on his way home from a trip to the gold fields in the vicinity of Lewiston, Ida. Last fall Mr. Burnell returned from a three years' trip to the headwaters of the Amazon river, a section of South America that he reported upon his return as being richly laden with gold, though hard to mine.

Since the announcement, a few days ago, that very rich gold ore had been uncovered at Cactus peak, several miles northeast of Goldfield, a report has been sent out that Stonevale Springs, twenty-five miles southeast of Goldfield, is coming to the front.

OGDEN AND RETURN, \$1.00.

Via D. & R. G., Sunday, Aug. 14.

Personally conducted Koltz excursion to Ogden canyon. Refreshments served free on the train. Bicycles carried free. Pay one dollar for your ticket—we do the rest. Special train leaves Salt Lake 10 a. m. Returning leaves Ogden 10:30 p. m.

LEGAL.

Delinquent Notice.

COMMONS SILVER MINING COMPANY. Principal place of business, room 45 Progress building, Salt Lake City. Notice is hereby given to the delinquent upon the following described stock, on account of assessment No. 8, levied on the 24th day of June, 1904, the several names and opposite the names of the respective shareholders, as follows:
